Benefits of polycarbonate capillaries

- more cost effective analysis by reduced cost per analysis
- same procedure as with standard glass capillaries
- minimised risk of DNA-contamination and injuries caused by broken glass capillaries
- same sensitivity as with standard glass capillaries
- sample recovery after PCR possible
- ELI_CAP® are RNase, DNase and Pyrogen free
- convenient packing and therefore improved ease of handling of the capillaries

Genaxxon BioScience GmbH

* Prices valid until 31.12.2006

Racks with polycarbonate capillaries

Polycarbonate capillaries in 96 rack

Capillary caps in 96 rack

10 x 96 capillaries plus caps
